TMJ 3213-3053-22
Beslagsprotokoll TV213-BP2022-8738-67

## Omständigheter

I ”PM Samanställning av analys-, halt-, och viktrapporter, 3213-3053-22” har undertecknad uppmärksammat att det blivit en felskrivning i sammanställningen avseende den sammanlagda mängden MDMA tabletter. Denna promemoria syftar till att rätta felskrivningen och redogöra för den korrekta mängden.

## Rättelse

Total mängd MDMA tabletter i beslagsprotokoll TV213-BP2022-8738-67 uppgår till **16,5 stycken**, nedan redovisas grunden till rättelsen.

I ”Analysrapport TV213-BP2022-8738-67 P.40-48” redovisar Tullverkets Laboratorium att beslag TV213-BP2022-8738-67 position 43 samt 46 består av sammanlagt 16,5 stycken MDMA tabletter.

| | | |
|---|---|---|
| **Material 4:** | Er materialbeteckning: | TV213-BP2022-8738-67-43 |

## Förtydligande gällande bilder i Bilaga Regulatorvägen

**Omständigheter**

Denna promemoria syftar till att förtydliga att fotona på sidorna 54-55 i Bilaga Regulatorvägen avser Fornudden AB:s lokal och saknar således relevans för utredningen.

Att fotona redovisas under rubriken ”Regulatorvägen 15” är felaktigt. Troligen därför att man vid tidpunkten för när fotona togs, trodde att lokalen var belägen på nummer 15 eftersom man trodde att den lokal som är aktuell för denna förundersökning, var belägen på Regulatorvägen 17, även det är felaktigt.

För mer information om numrering av Regulatorvägen se PM ”Regulatorvägen 15 samt 17” på sidan 1 i Bilaga Regulatorvägen. För mer information om placeringen av Fornudden AB:s lokal, se PM ”Fastighetsinnehavare Regulatorvägen 17” sidorna 203-206 i Bilaga Regulatorvägen.

## Tillgång till lokal på Regulatorvägen 15, Huddinge

**Objekt**

| | |
|---|---|
| Namn<br>Mladen, Kupresic | Personnr/födelsedatum<br>19630710 |
| Namn<br>Stjärnfeldt, Per MAGNUS | Personnr/födelsedatum<br>19670625-0138 |
| Namn<br>Belawni, Omar | Personnr/födelsedatum<br>19880930-1792 |
| Brott<br>Grovt narkotikabrott | |

**Omständigheter**

2022-12-27 utfördes en husrannsakan på Regulatorvägen 15 i Huddinge. Vid husrannsakan beslagtogs 4737 gram cannabis. Misstänkta för detta brott är Mladen Kupresic, Magnus Stjärnfeldt samt Omar Belawni.

Denna promemoria syftar till att redogöra för vilka personer som haft tillgång till lokalen på Regulatorvägen 15 under den period som är relevant för utredningen, 30 november till 27 december 2022.

Nämnd lokal förvaltas av Fabege AB. Lokalen hyrdes ut till Victorious Group AB under perioden 2020-10-12 till 2023-03-31. VD för Victorious Group AB är Björn Lewander.

I förhör med Lewander har det framkommit att han i sin tur hyrt ut lokalen till Omar Belawni som har haft möjlighet att förfoga över lokalen genom nyckel. Belawni har förfogat över lokalen sedan mitten av november 2022. [1]

2022-11-30 observerade tullkriminalens spaningspersonal ett möte mellan Magnus Stjärnfeldt och Mladen Kupresic. Spaningspersonal observerade även att Stjärnfeldt öppnade porten till lokalen så att Kupresic kunde köra ner dragbil med registreringsnummer ECP6613 i lokalen. Därefter stängde Stjärnfeldt porten. Stjärnfeldt var kvar i lokalen en stund efter det att Kupresic lämnade området.

Under utredningen har ingen nyckel till Regulatorvägen 15 påträffats hos varken Kupresic, Stjärnfeldt eller Belawni. Lewander hade inte heller någon nyckel till nämnd lokal sedan han hyrde ut lokalen till Omar Belawni.

**DNA**

Under husrannsakan som utfördes i lokalen på Regulatorvägen 15, 2022-12-27 säkrades DNA från en cigarettfimp som låg på ett soffbord i vardagsrummet/köket. Utredningen har visat att det är DNA tillhörande en person vid namn Antanas Butenas. Tullkriminalen har gjort flertalet försök att nå Butenas i syfte att hålla ett vittnesförhör med honom gällande nämnt DNA fynd. Tullkriminalen har dock inte kunnat nå Butenas varför han ej är hörd i denna utredning.

[1] Sid 365 i ***Bilaga Regulatorvägen 15*** Förhör med vittne Björn Lewander "*vid tidpunkten den 16 november har Omar tillgång till Regulatorvägen 15*". Sid 371–411 i ***Bilaga Regulatorvägen 15*** Sms och MMS från Björn Lewanders telefon. Sms sker mellan den 15 november till 20 december 2022.

DNA från ytterligare en person säkrades från en rakhyvel som låg på badrumsgolvet i lokal på Regulatorvägen 15. Utredningen har visat att det är DNA tillhörande en person vid namn Martynas Gavrilenka Tullkriminalen har gjort flertalet försök att även nå Gavrilenka i syfte att hålla ett vittnesförhör med honom gällande nämnt DNA fynd. Tullkriminalen har dock inte kunnat nå Gavrilenka varför han ej är hörd i denna utredning.

Med anledning av att varken Antanas Butenas eller Martynas Gavrilenka har avhörts i utredningen är det okänt om dessa personer har haft tillgång till lokalen på Regulatorvägen 15.

Sammanfattningsvis har utredningen visat att i vart fall Mladen Kupresic, Magnus Stjärnfeldt, Omar Belawni samt Björn Lewander haft tillgång till lokal på Regulatorvägen 15.

## Antanas Butenas och Martynas Gavrilenka är ej hörda i utredningen

### Objekt

| Namn | Personnr/födelsedatum |
|---|---|
| Antanas Butenas | 19900183-3236 |
| Namn<br>Martynas Gavrilenka | Personnr/födelsedatum |
| Brott | |

### Omständigheter

Inom ramen för denna förundersökning utfördes en husrannsakan på Regulatorvägen 15 i Huddinge 2022-12-27. I samband med det säkrades DNA från en cigarettfimp som låg på ett soffbord i vardagsrummet/köket i lokal på Regulatorvägen 15. DNA:t kommer från en person vid namn Antanas Butenas.

**Dna träffprov:**

| | |
|---|---|
| Namn: | Antanas Butenas |
| Personnummer: | 19900183-3236 |
| Register-ID: | R071963-11 |
| Personen provtagen i K-nr, myndighet: | 5000-K1405394-18, Polismyndigheten |
| Slutsats: | **Resultaten talar extremt starkt för** att DNA:t i sökprovet kommer från Antanas Butenas *(Grad +4)*, om man bortser från möjligheten att det kommer från en nära släkting. |
| NFC:s träff-ID: | 2023000382SP |

Även DNA från en person vid namn Martynas Gavrilenka säkrades under husrannsakan. Hans DNA säkrades från en rakhyvel som låg på badrumsgolvet i lokal på Regulatorvägen 15.

**Dna träffprov:**

| | |
|---|---|
| Material: | TV213-BP2022-9054-62-27 B S1. Avtork (topsning)från rakbladen på en rakhyvel |
| Beteckning: | TV213-BP2022-9054-62-27 B S1 |
| Register-ID: | S004710-23 |
| K-nr, myndighet: | 3000-3213-3154-22, Tullverket |
| Brottskod: | 5010 - Brott mot narkotikastrafflagen |
| NFC:s dnr: | 2023001148 |
| Slutsats: | **Resultaten talar extremt starkt för** att DNA:t i träffprovet kommer från Martynas Gavrilenka *(Grad +4)*, om man bortser från möjligheten att det kommer från en nära släkting. |
| NFC:s träff-ID: | 2023000598PS |

Tullkriminalen har gjort flertalet försök att kontakta både Antanas Butenas och Martynas Gavrilenka i syfte att höra dessa personer om omständigheterna kring att deras DNA påträffats på föremål i lokalen på Regulatorvägen 15. Dessvärre har tullkriminalen ej lyckats komma i kontakt med någon av nämnda personer.

## Förevisade foton på misstänkta personer i fotokonfrontation

**Objekt**

| | |
|---|---|
| Namn<br>Filander, Hans Bror AXEL | Personnr/födelsedatum<br>19970422-8056 |
| Namn<br>Belawni, Omar | Personnr/födelsedatum<br>19880930-1792 |
| Brott<br>Synnerligen grov narkotikasmuggling | |
| Brott<br>Synnerligen grovt narkotikabrott | |

**Omständigheter**

2023-03-17 hölls förhör med vittnet Xurtin Zozani Shahab Alsadeeqi, fortsättningsvis nämnd Xurtin. Under förhöret utfördes två fotokonfrontationer, konfrontation A och B, i syfte att undersöka om någon person på förevisade foton var de personer som Xurtin träffade i samband med försäljningen av fordon med registreringsnummer JRY169 2022-12-05. Xurtin kunde ej peka ut någon person som förevisades för honom under konfrontationerna.

Underlaget till fotokonfrontationerna återfinns i sidomaterialet till denna förundersökning. Denna promemoria syftar till att redovisa foton från nämnda konfrontationer på två av de misstänkta personerna i denna utredning, Omar Belawni och Axel Filander.

**Omar Belawnis foto redovisas i fotokonfrontation A, nummer 6.**

6

**Axel Filanders foto redovisas i fotokonfrontation B, nummer 4**.

## Utdrag ur Sami Myyräs kontoutdrag

### Objekt

| Namn | Personnr/födelsedatum |
|---|---|
| **Myyrä, SAMI Petteri** | 781002-9277 |
| Brott | |

### Omständigheter

Sami misstänks ha upplåtit sitt bankkonto med kontonummer 8270-1, 913 804 916-9 hos Sparbanken Rekarne för att ta emot 125 000 kr. Därefter har han omsatt pengarna genom att föra de vidare till olika personer och företag enligt nedan. Sami förefaller ha erhållit 2 000 kr i ersättning för att utföra dessa transaktioner.

| Synnerligen grovt narkotikabrott | |

**Omständigheter**

Misstänkt Mikael Olsson bedöms vara brukare av telefonnummer 46739036106 och telefonnummer 46769193939.[1,2]

Aktuell promemoria redogör för några av de uppkopplingar som Mikael Olssons telefoner med telefonnummer 46739036106 och 46769193939 har mot basstationer specifikt den 9 november 2022 och den 2 december 2022.

**Analysmaterial**

Det material som analyserats inom ramen för upprättandet av denna promemoria är följande:

- Historisk telefontrafik avseende telefonnummer 46739036106 för de aktuella dagarna
- Historisk telefontrafikdata (se **bilaga** gällande datalistor) avseende telefonnummer 46739036106
- Historisk telefontrafik avseende telefonnummer 46769193939 de aktuella dagarna
- Historisk telefontrafikdata (se **bilaga** gällande datalistor) avseende telefonnummer 46769193939
- Inkommen historisk telefontrafik återfinns i sidomaterialet

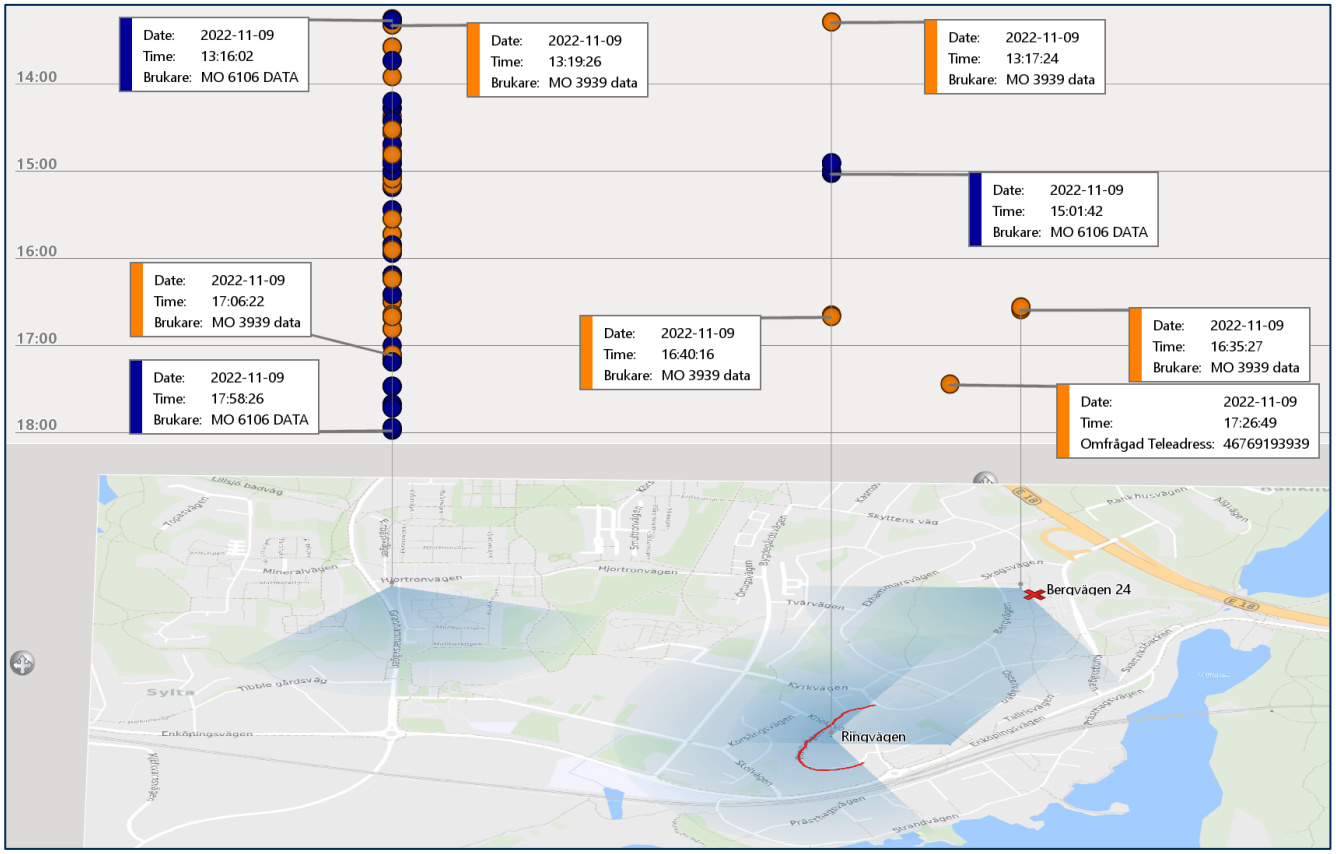
De geografiska uppkopplingar som framgår i den historiska telefontrafik som inhämtats har lagts in i analysprogrammet GeoTime i vilket de kartbilder som återfinns i bilagorna har skapats. Kartbilderna ska läsas enligt följande:

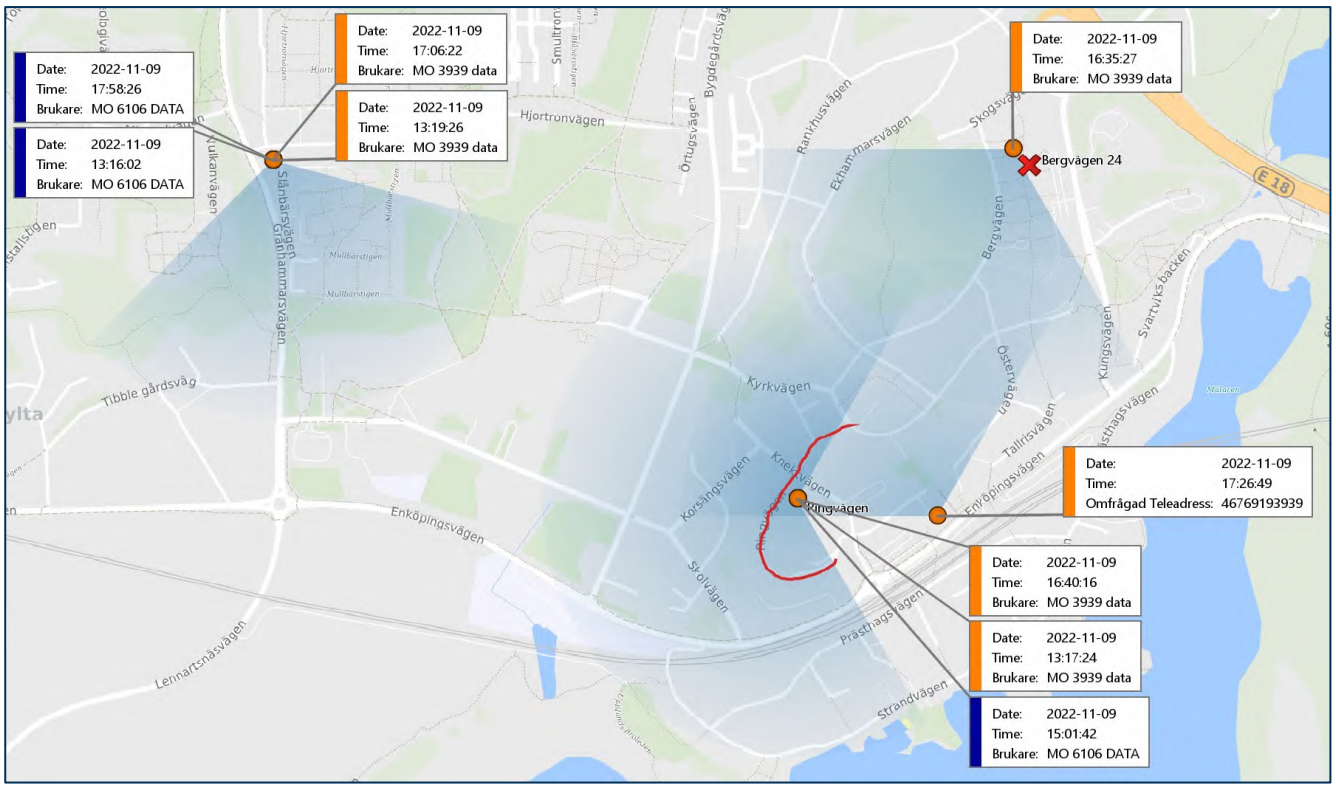
- Positionen för den basstation som telefonnummer -6106 kopplat upp mot förevisas med mörkblå prickar
- Positionen för den basstation som telefonnummer -3939 kopplat upp mot förevisas med orange prickar
- I vilken riktning som telefonnummer -6106 och -3939 har befunnit sig i förhållande till aktuell mast förevisas med en blå trekant. Trekanten visar inte det exakta täckningsområdet utan enbart riktningen
- Adressen Bergvägen 24 i Kungsängen har markerats med ett rött kryss.
- Ringvägen i Kungsängen har markerats med en röd linje.

[1] PM Telefonnummer 46739036106
[2] PM Telefonnummer 46769193939

**Uppkopplingar den 9 november 2022**

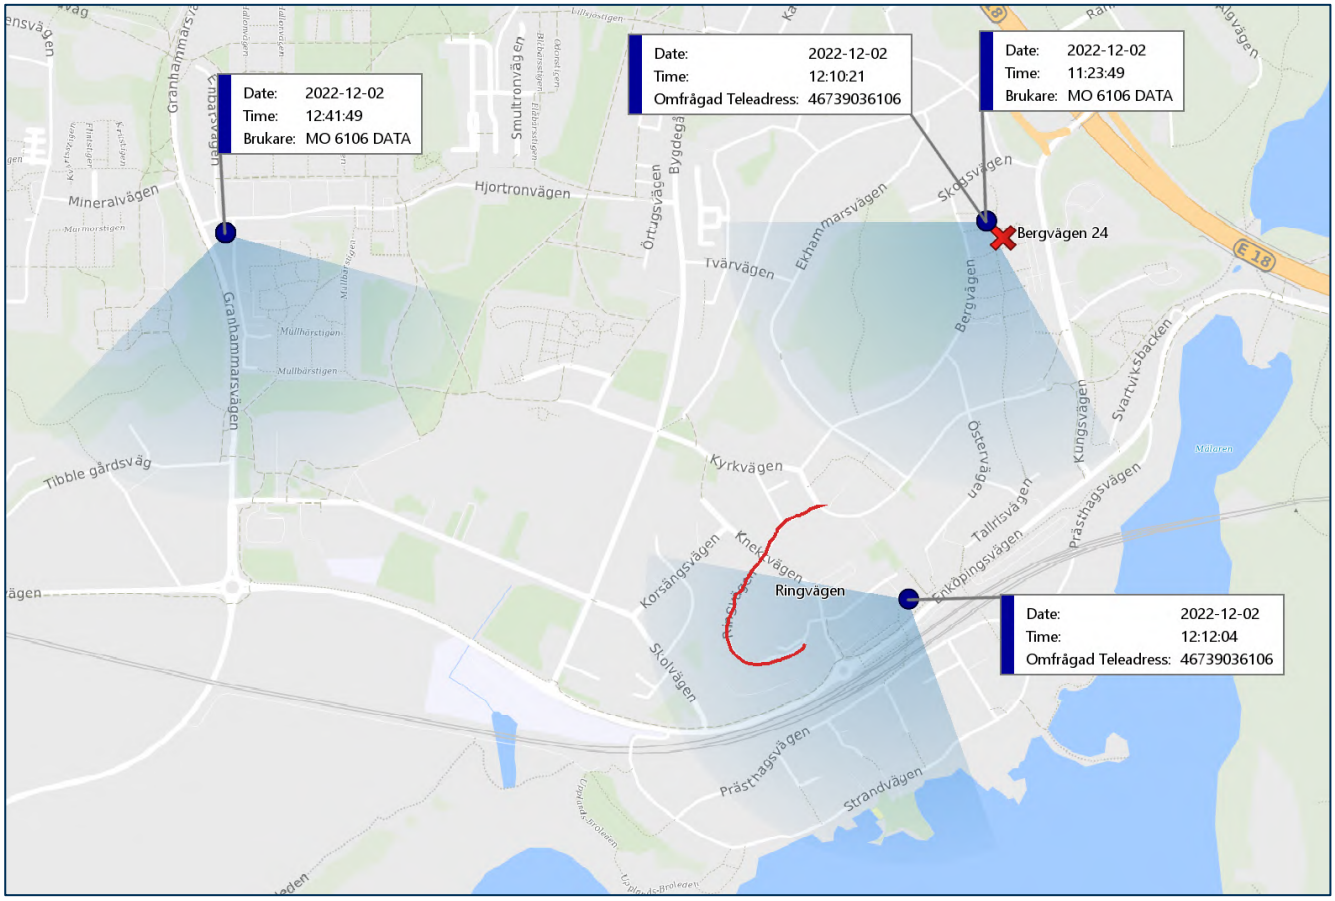
Den 9 november 2022 mellan klockan 13:00 – 18:00 kopplar -6106 och -3939 upp mot basstationer i Kungsängen enligt nedan redovisad karta. Enheterna kopplar under denna tid uteslutande upp mot basstationer i områden i närheten av Kungsängen. Större delen av uppkopplingarna sker i form av datauppkopplingar för båda enheter.





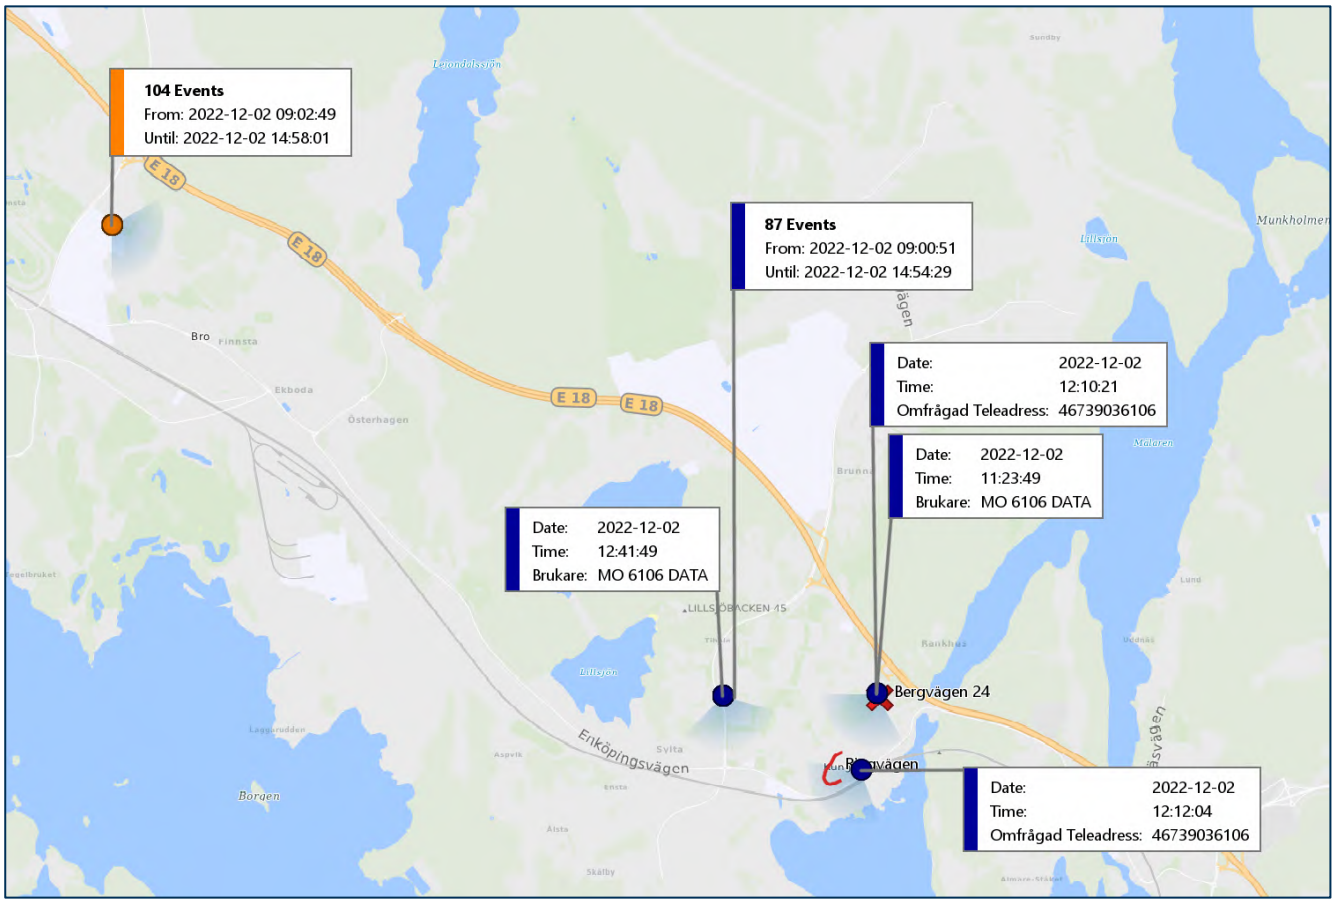
**Uppkopplingar den 2 december 2022**

Den 2 december 2022 har -6106 ett flertal uppkopplingar mot basstationer i Kungsängen enligt nedan kartbild. Det förekommer även ett stort antal datauppkopplingar. Basstationerna ligger i närheten av Ringvägen samt Bergvägen 24 i Kungsängen. I nedan tabell redovisas datauppkopplingen som sker klockan 11:23 mot basstation Kungsängen 210°.



| Kommunikationstyp | Pos_Start_ Datum | Pos_Start_ Tid | A_Part_Nummer | Pos_Start_Cellnamn | Pos_Start_Latitud | Pos_Start_Longitud | Pos_Start_ Riktning | Pos_Start_System |
|---|---|---|---|---|---|---|---|---|
| Data | 2022-12-02 | 11:08:49 | 46739036106 | Tibble N4M 165° | 59,48460000 | 17,72870000 | 165 | 4G |
| Data | 2022-12-02 | 11:23:49 | 46739036106 | KUNGSÄNGEN 210° | 59,48480000 | 17,75410000 | 210 | 4G_start (cellbyte) |

Telefonnummer -3939 har ett flertal uppkopplingar mot en basstation i närheten av Bro en bit ifrån Kungsängen. Uppkopplingarna sker främst i form av datauppkopplingar. Basstationernas geografiska position visas i nedan kartbild. Nedan uppkopplingar sker mellan klockan 09:00 – 15:00 den 2 december 2022.



# *1* Bearbetning av datalistor från Tele2

Dokumentet är upprättat av STI på Noa i samverkan med polisområde Stockholm Syd. Dokumentet utgör en officiell promemoria som får användas som underlag för operativa analyser i förundersökningar och som bilaga i FUP.

## *1.1 Datalistor*

I samband med att en enhet använder sig av mobildata sparas uppgifter hos operatören om bland annat de celler som enheten kopplar upp mot i mobilnätet. Dessa uppgifter kan av Polisen begäras ut i formen av en datalista från operatören. Denna promemoria utgör underlag för tolkning och bedömning av datalistor från operatören Tele2.

## *1.2 Tolkning av datatrafik*

En modern smartphone är uppkopplad mot mobilnätet i princip dygnet runt. Det beror på att data skickas till och från telefonen konstant, oavsett om den aktivt brukas eller inte. En och samma datasession kan pågå under dagar, veckor eller månader om inte telefonen exempelvis stängs av, försätts i flygplansläge eller av annan anledning förlorar kontakten med mobilnätet. Denna datasession delas sedan upp av teleoperatören i de rader som vi ser i en datalista. En sådan enskild rad i en datalista utgör vad som refereras till som en ”datapost”.

Uppdelningen av datasessionen till enskilda dataposter sker i interna system hos operatören. Att en datapost avslutas och en ny påbörjas beror på en mängd tekniska variabler såsom: att mängden data som skickats överstiger en viss gräns, att en tidsbegränsning uppnåtts, att enheten förflyttat sig från ett geografiskt område till ett annat, eller att surfen övergår från en teknik till en annan (exempelvis från 3G till 4G).

Uppdelningen av dataposter har därför ingen direkt koppling till enskilda aktiva handlingar av brukaren. En enskild datapost kan således *inte* kopplas till en enskild handling av brukaren eller exempelvis en enskild bakgrundsuppdatering av en applikation. Varje datapost innehåller istället en mängd olika typer av datatrafik, både data som genererats av aktiva handlingar, såsom att streama film, lyssna på musik eller spela spel, och data som genereras *utan* aktiva handlingar, såsom appars bakgrundaktivitet, uppdateringar och kontakt med exempelvis mejlservrar.

Ovan gör gällande att en modern smartphone i regel har datauppkopplingar dygnet runt. Det innebär *inte* att enheten aktivt brukas dygnet runt. Upp- och nedladdningar av data sker även när en smartphone ligger stilla oanvänd eftersom enheten behöver vara uppkopplad mot nätet för att kunna göra sådant såsom att uppdatera mejlen, ta emot meddelanden och sköta applikationers bakgrundsaktiviteter. Exempelvis uppdaterar många moderna telefoner applikationer och operativsystem under perioder då telefonen *inte* aktivt brukas, vanligen mitt i natten. Det innebär att stora mängder data kan laddas upp och ner från en enhet även när dess brukare inte använder den, så länge enheten är påslagen och ansluten till mobilnätet.

### *1.3 Bedömning av lokaliseringsuppgifter*

Likt i en samtalslista är samtliga lokaliseringsuppgifter som återfinns i en datalista korrekta i den mening att enheten kopplat upp mot alla de celler som återfinns i listan. Det som skiljer en datalista från en samtalslista är istället att den angivna tidsstämpeln för varje enskild lokaliseringsuppgift i en datalista i regel inte är lika exakt som i en samtalslista. Tidsangivelsen för varje enskild lokaliseringsuppgift i en samtalslista är på sekunden exakt, medan tidsangivelsen för en enskild lokaliseringsuppgift i en datalista inte i samtliga fall är på sekunden eller minuten exakt.

Slutsatser om *var* en enhet befunnit sig och vilka resor som genomförs kan således dras med samma säkerhet oavsett om grundmaterialet utgör en samtalslista, en datalista eller material från både och. Slutsatser om exakt *när* en enhet befann sig under varje enskild angiven cell kan dock i regel (med vissa undantag) inte göras med samma exakthet om grundmaterialet utgörs av en datalista. I en bedömning av *när* en enhet kopplade upp mot en särskild cell baserat på endast material från en datalista kan därför ordval som att en datalista ”indikerar” att uppkopplingen skedde vid en särskild tidpunkt vara lämpliga.

Att tidsangivelsen för varje enskild datapost inte är på sekunden eller minuten exakt likt i en samtalslista beror på hur radionätet och operatörens interna system fungerar. Tekniken innebär att det finns en risk att lokaliseringsuppgifterna inte uppdaterats i samma sekund som en datapost påbörjas eller avslutas, lokaliseringsuppgiften kan vara inhämtad sekunder eller minuter tidigare. Lokaliseringsuppgiften är i dem fallen istället den ”senast kända”. Lokaliseringsuppgifterna riskerar därmed att vara sekunder eller minuter ”gamla” eller ”kvarhängande” i relation till tidsstämpeln. Det innebär i praktiken att en enhet exempelvis kan ha kommit till eller lämnat en plats något tidigare än vad dess datalista indikerar.

Lokaliseringsuppgifterna riskerar dock aldrig att vara inhämtade från ett senare tillfälle än vad en datalista anger. En datalista kan aldrig visa en förflyttning *innan* den skett.

Som en generell regel har Tele2 angett att tidsangivelsen för en lokaliseringsuppgift i en datapost *i princip kan antas vara korrekt* om den skiljer sig från föregående lokaliseringsuppgift. Det vill säga om det *de facto* har skett en uppdatering av cellinformationen relativt till föregående datapost och den därmed inte kan vara direkt ”kvarhängande”. Notera dock att detta fortfarande *inte* innebär att uppgiften behöver gälla för sekunden eller minuten i tidsangivelsen, men att den med större säkerhet är närmare i tid än om den inte uppdaterats.

Det finns också tillfällen då lokaliseringsinformationen i en datalista är *ytterst exakt*. Ett sådant tillfälle är vid teknikbyten. Ett teknikbyte innebär att surfen övergår från en teknik (ex. 3G) till en annan teknik (ex. 4G). I samband med teknikbyten uppdateras alltid efterföljande dataposts startcell med *ytterst exakt* lokaliseringsinformation.

## Eriran från Mikael Olsson

**Objekt**

| Namn | Personnr/födelsedatum |
|---|---|
| Olsson, Mikael | 19890812-6272 |
| Brott | |
| Synnerligen grovt narkotikabrott | |

**Omständigheter**
Mikael Olsson har 2023-07-31, genom sin försvarare Ola Liljemark, inkommit med erinran på förundersökningsprotokoll i ärende AM-172679-22.

Denna promemoria syftar till att redovisa nämnd erinran samt svar på punkt 1-3 i erinran. Svar på punkt 4 har redan redovisats genom ”Tjänsteanteckning Röstanalys hos NFC ej möjlig” i Protokollbilaga 1.

## Erinran inkommen 2023-07-31

**Ärende AM 172679-22 ang. Mikael Olsson avseende erinran, uppgifter i sidomaterial och kompletterande uppgifter**

Hej,

På uppdrag av Mikael Olsson vill vi ta del av nedanstående material. Samt att vissa uppgifter klargörs enligt nedan.

**Angående telefoner och telefonnummer.**

Det anges att Mikael Olsson bedömts vara brukare av Samsung SM-A137F med telefonnummer 46739036106 och Samsung SM-G998B med telefonnummer 46769193939 (IT Analysbilaga s. 156)

Det anges att i mobiltelefonen Samsung SM-A137 har i applikationen Signal används telefonnummer 46739036106 och användarnamnet MacGhost samt att applikationen Signal finns installerad (IT Analysbilaga s. 158).

1) Vi vill därför ta del av samtliga skriftliga meddelanden som förekommit i appen Signal med mobiltelefon Samsung SM-A137 med telefonnummer 46739036106 eller 46769193939 under perioden 2022-10-01 – 2022-12-30.

Det anges att mobiltelefonen Samsung SM-G998B har använts telefonnummer 46769193939 när telefonen togs i beslag (IT Analysbilaga s. 264). Vidare anges att applikationen Signal finns installerad (IT Analysbilaga Bilaga D s. 286).

2) Vi vill därför ta del av samtliga skriftliga meddelanden som förekommit i appen Signal med mobiltelefon Samsung SM-G998B med telefonnummer 46739036106 eller 46769193939 under perioden 2022-10-01 – 2022-12-30.

**Uppkopplingar.**

I IT-Analysbilagan redovisas att telefonnummer har kopplat upp mot olika telefonmaster samt uppgifter om rörelsemönster. I Promemorian om datalistor från Tele2 framgår att en enhet använder sig av mobildata som sparar hos operatören om bland annat de celler som enheten kopplar upp mot i mobilnäten och att en modern smartphone är uppkopplad mot mobilnätet i princip dygnet runt (IT Analysbilaga s. 353).

Enligt information på internet framgår bl. a. följande. En mobilcell är en del av ett mobilnätverk som täcker en viss geografisk yta. Räckvidden för en mobilcell kan variera beroende på flera faktorer som till exempel terräng, bebyggelse och antalet användare i området. Enligt en källa kan räckvidden för en mobilcell vara mellan 1 och 30 kilometer.

3) I utredningen har redovisats uppgifter om påstådda rörelsemönster men det saknas uppgifter om mobilcellernas räckvidd. Vi vill därför att det inhämtas uppgifter från de aktuella nätoperatörerna angående vilken räckvidd som mobiloperatörerna ungefär haft i sina celler/master i de områden som är aktuella. Alternativt vill vi att det vitsordas vilken ungefärlig räckvidd en mobilcells täckning uppgår till, se ovan.

Advokat Ola Liljemark har specificerat vilka täckningskartor som avses.
De master vars täckning uppgift önskas om är de som omfattas i bilagorna som hänvisas till i de angivna PM dvs:

- Bilaga B1 s 251.
- Bilaga B2 s 252.
- Bilaga C1. S. 253.
- Bilaga C2 s 254.
- Bilaga D1 s 258.
- Bilaga E2 s. 260
- Bilaga E3 s. 261
- Bilaga E4 s. 262.
- Bilaga E5 s. 263.

och

- Bilaga A s. 310
- Bilaga B s. 311.
- Bilaga B2 och B3 s. 312.
- Bilaga C s. 313.
- Bilaga C2-3. S 314.
- Bilaga C4-5 s. 315
- Bilaga C6-7 s. 316
- Bilaga C8-9 s. 317
- Bilaga D1 s. 318
- Bilaga D2-3 s. 319.
- Bilaga D8 s. 322.
- Bilaga E1 s. 323.
- Bilaga E2 s. 324.

Samtliga ovan bilagor i IT Analysbilaga.

**Ljudanalys.** I PM Ljudfiler anges att syftet med promemorian är att redogöra för hur vida rösten i ljudfilerna som skickas från användaren Meekarn låter som Mikael Olssons. Utredaren har lyssnat på samtliga ljudfiler som skickats i chatten av användaren Meekarn. Underlaget består av sammanlagt 4 stycken ljudfiler, vilka har transkriberats och återfinns i PM Chattkonversation mellan Luci, ICEMAN och Meekarn. Utredaren Karolina Tillborg anför att hon vid tidpunkten för upprättandet av PM:et medverkat på två förhör med Mikael Olsson. Förhören har varit omkring två timmar långa vid respektive förhörstillfället även per telefon övervakat flertalet samtal som Mikael fört från häktet med sin före detta sambo och hans barn. Enligt utredaren är det fullt

möjligt att det är Mikael Olssons röst som hörs på ljudfilerna. Dialekten och rösten låter som Mikaels. Den som pratar på ljudfilerna är dock uppenbart hes, vilket Mikael inte varit vid något av de tillfällen som undertecknad träffat eller pratat med honom. Utöver hesheten så hörs ingen uppenbar skillnad från Mikael Olssons röst (IT Analysbilaga PM s. 350)

4) Vi vill att det klargörs vad Karolina Tillborg har för utbildning avseende röstanalyser.

Med vänlig hälsning,
**Ola Liljemark Ragnar** I Advokat

## Svar på erinran punkt 1-2

Analytiker på tullkriminalen har konstaterat att Signal-appen har varit installerad i båda telefonerna tillhörande Mikael Olsson. Det finns dock enbart meddelanden på Signal i telefon med beslagsnummer TV213-BP2022-8905-60-2 (Samsung SM-A137F). Samtliga chattar från Signal för telefon med beslagsnummer TV213-BP2022-8905-60-2 **redovisas i bilaga 1 till denna promemoria.**

## Svar på erinran punkt 3

Tullkriminalen har hämtat in täckningskartor enligt nedan. Kartbilderna redovisas som **bilaga 2 till denna promemoria.**

Storydags

Nu finns Stories i Signal!

Skicka foto-, video- och textstories till utvalda vänner och grupper. De försvinner automatiskt efter 24 timmar och är (naturligtvis) end-to-end-krypterade.

Tryck på fliken Stories längst ner på skärmen för att börja dela stories med de personer som du redan pratar med på Signal.

Läs meddelandet här

Ärende/Rubrik
## PM Föreskrivet recept, Oxycodone, Pia Jakobsson

## Objekt
Efternamn och alla förnamn (tilltalsnamnet markeras), personnummer/födelsedatum, adress, främmande nationalitet, fordonets registreringsnummer, företagsnamn, organisationsnummer eller annan beskrivning etc.

**PIA** Carita Jakobsson
19710628-0527

## Bakgrund
Inom ramen för förundersökning 3213-3053-22 avseende grovt narkotikabrott har information inhämtats och analyserats. Berörda objekt kommer fortsättningsvis att benämnas vid sina förnamn. Undertecknad har dagens datum inhämtat information från E-hälsomyndigheten avseende vilka läkemedel och recept som Pia haft förskrivet och tagit ut under perioden 2021-05-01 – 2022-12-13.

## Omständigheter
Nedan redovisas de omständigheterna som ligger till grund för den aktuella promemorian. Uppgifterna kommer från den nationella läkemedelslistan som visar förskrivna och uttagna receptbelagda läkemedel (e-recept och pappersrecept), perioden som listan visar är 2021-05-01 – 2022-12-13. Underlaget återfinns i sin helhet i sidomaterialet.

### Nedan förevisas de recept av Oxycontin som Pia Jakobsson fått förskrivet

| Dospåse | Utfärdande datum | Förskrivet av | Förskriven vara | Dosering | Antal uttag | Mängd per uttag | Intervall | Status |
|---|---|---|---|---|---|---|---|---|
| Nej | 2021-06-30 | Ehsan Akbarian,, Läkare, Danderyd Sjukhus AB, Entrévägen 2, målpunkt H, 18288, Stockholm | OxyContin, depottablett 5 mg, Blister, 28 tabletter | 1 tablett på morgonen, 1 tablett till kvällen mot smärta | 1 | 28 | - | Avslutad |

### Nedan förevisas de recept av Oxycontin som Pia Jakobsson hämtat ut på apotek

| Expeditionstidpunkt | Uthämtad vara | Expedierad mängd | Dosering | Förskrivet av |
|---|---|---|---|---|
| 2021-06-30 16:26:45 | Oxycodone Teva, kapsel, hård 5 mg | 28 | 1-2 kapslar vid behov mot smärta. Max 6 st per dygn | Ehsan Akbarian,, Läkare, Danderyd Sjukhus AB, Entrévägen 2, målpunkt H, 18288, Stockholm |

## Polibeslag Hägersten med koppling till Pia Jakobsson

### Objekt

| Namn | Personnr/födelsedatum |
|---|---|
| Pia Jakobsson | 19710628-0527 |
| Brott<br>Grovt narkotikabrott | |

### Omständigheter

Pia Jakobsson, fortsatt benämnd som Pia, greps den 13 december 2022 misstänkt för överlåtelse och innehav av stora mängder narkotika, bland annat amfetamin, cannabis, 3-CMC och kartor med det narkotikaklassade läkemedlet Ksalol. Tullkriminalen har under utredningens gång fått vetskap om att Pias DNA påträffats på en gummisnodd lindad runt kartor med Ksalol i samband med ett större beslag av narkotika i en lägenhet i Hägersten i Stockholm den 20 april 2023. Det har inte påträffats någon koppling mellan Pia och lägenhetsinnehavarna.
Nedan visas de för utredningen relevanta delarna ur polisens förundersökning.
På en säng i vardagsrummet i lägenheten påträffades en kartong innehållandes 6 179 st tabletter Ksalol i kartor omlindade med gummisnoddar var av det på en av gummisnoddarna påträffats DNA från Pia.

Urklipp från polisens bildbilaga[1].
